

11th International ICNE Conference Clinical Ethics across the Lifespan 13.-14.9.2010

TECHNOLOGY DURING THE CONFERENCE

Computers and programs

All the lecture rooms are equipped with computers, video projectors and a set Internet.

Programs:

- Windows Office 2003 (Word, PowerPoint & Excel)
- Adobe Reader 9.0
- Mozilla Firefox 2.0 & Internet Explorer

Participant's own computers & Wireless Internet

In every room will have plugs for own laptops. But obviously there won't be enough plugs for **everyone**, so please charge your batteries in advance when you can, in the hotel or in the breaks.

In the campus we also have a **wireless net**, *Sparknet*. All the participants will have their own username and password to access Sparknet during the conference.

Computer class

If you don't have your own laptop with you, you have the chance to use a computer in the computer class, for reading e-mails etc. The computer class is in the same building as the conference, on the 1st floor. All the participants will have the same username and a password to access the computers.

If you have any questions about the technology, please contact:
adp-advisor, Ninja Lehtonen, ninja.lehtonen@utu.fi
